

# The Girl who used to be Delight

piano and computer

Stefan Klaverdal

© 2007

commissioned by Rikskonsertet  
dedicated to Johan Hugosson and Delirium

first performed by Johan Hugosson  
april 2007 in Lund

## **About the piece**

When speaking about inspiration for this piece I have to mention Neil Gaiman, since I base it at least partially on his books in the series The Sandman. It is in a way difficult to describe what they are about, since the books contain a multitude of stories and lives, but the essence is about the seven endless, immortal personal manifestations of various aspects of human life.

When reading I became very touched by the character "Delirium", she is a girl, old as humanity, but youngest of the endless. She started her life as Delight, but somehow stopped being that and became instead Delirium, a disshelved girl with mismatched eyes, clothes in rags, and hair that shifts colour by the minute.

Delirium is often very interested in unexpected things, although she gets easily distracted and becomes interested in something else. In the now, however, she can be extremely dedicated to what interests her at the moment.

This piece is dedicated to her, and to her strange skill to be totally focused on one thing, yet moving to something else at the same time.

## **About the computer part and notation**

The computer part is conceived to be played by an active musician, which means that this piece is in fact a type of duo. In order to play the piece one needs

A 4.1 surround loudspeaker system, two in front, two in rear and one subwoofer.

A computer running Max/MSP ver. 4.3 or later.

The patch for the piece, available from the composer. It is only tested on Apple computers.

Preferrably a midi controller, like JLCoopers CS-32 or equivalent.

Two microphones to pick up sound from the piano.

The computer part is largely free and somewhat improvised. The player follows notes in the score, and correspondingly uses the controller to raise or lower the volume, change the pitch etc.

There is also a pre-programmed version of the piece, more static.

In the piece there are some special notation and instructions. These are explained on the following pages.

## Rules for notation

In this piece, there are three different layers of the usage of rythms:

"In tempo" - normally notated music, following normal rules.

"Quasi tempo" - normally notated music with dotted barlines, plays rubato.

"Unmeasured" - rythmically free. Play freely (rubato). Is supposed to be played rythmically free and independent of any puls and other parts.

## Special signs and symbols in unmeasured parts

● = *short note*

○ = *long note*

♪ = *very short note, or ornament*

• = *phrase ending or very short rest*

˘ = *rest (if not placed above a note, then it is a normal fermata)*
